SYNOPSIS ON “ TRENDZOLE (Online Shopping Zone) ”

Introduction about the project:

In this project we are providing online shopping zone. In online shopping we provide here three types of shirts T-shirts, hoodies and normal shirts. In this project we are providing both the public and private access to customers.

In this project we are providing different types of designs, texts, colors to the customers. If customer didn't like any type of designs, He/She can place the orders from the customers which type of designs he or she wants and which type of colors, text they want.

In this we are providing the different images by showing the front and back look of the shirts.

We are also provide different designs if customer has no about the designs. We can design for customers, it is useful for those customers every much.

Project Category:

This project will be basically developed by using HTML & CSS.

Introduction about HTML & CSS :

Html is a standard markup language for creating web pages. HTML stands for Hyper Text Markup Language. Hyper Text Markup Language describes the structure of web pages using markup.

Html elements are the blocks of html pages. Html elements are represented by tags. Html tags label pieces of content such as “heading” ,”paragraph” , ”table” , and so on. Browsers do not display the html tags, but use them to render the content of the page.

CSS is a language that describes the style of an html document. CSS stands for Cascading Style Sheet. CSS is a language for describing the presentation of web pages, including colors, layouts, and fonts.

PURPOSE OF THE PROJECT:

- The main purpose of this project is here we can design a photo or text on the shirts that which type of design you want. Here the company also provide some designs to the shirts or you can design your shirt in your own way.
- Everyone has different taste and ideas in the selection of the shirts in this project we will full fill his or her taste or ideas by providing designs on shirts.

FEATURES OF THE PROJECT:

- It is online shopping zone website.
- It contains three type shirts for the user.
- We can keep updates on each shirt.
- In this project if a customer need a shirt with his/her design. They can select private option for secure their design in ordering.
- This TrendzOle provides the security to the customer designs.

CONCLUSION:

My project “TrendzOle (Online Shopping Zone) ” is a online shopping website which contains the basic details of the shirts and types of designs and texts. This project provide the designs and texts what the customer need . this project provides different types of shirts with different designs, different color, different texts. This project provides three types of shirts T-shirts, hoodies, normal shirts

FUTURE SCOPE:

- This project is basically developed by using HTML (Hyper Text Markup Language) & CSS (Cascading Style Sheet). It can be further developed by using java core, python.
- Providing to the customer in online design flat form.
- Without opening the new tap for to seeing shirt color and design user can see the different colors in the main page.
